

**BERGANDI MACHINERY COMPANY IS NOW
SERVING THE TEMPORARY FENCE INDUSTRY WITH
ITS UNIQUE PATENTED **FLATLINK™** FENCE PANELS**

**REGULAR
CHAIN LINK**

**PATENTED
FLATLINK™ FENCE**

FEATURES

- 1-3/8" .065 perimeter frame with 1" cross-bracing
- FLATLINK™ Fabric wire-wrapped within the frame and recessed against cross-bracing
- FLATLINK™ Fabric selvage is folded horizontally and secured with a durable 1/2" lap-weld
- All materials are galvanized and welds are coated with a zinc-rich primer

BENEFITS

- Frame configuration provides an ideal strength to weight ratio
- FLATLINK™ Fabric is protected on 4 sides by the frame and recessed to prevent snagging
- More durable panel means greater return on investment
- FLATLINK™ selvage creates a stronger, more durable bond that is virtually snag-proof
- Easier, safer, snag free handling means quicker installs and more productivity

FLATLINK™ Panels are made in the U.S.A.

BERGANDI MACHINERY COMPANY IS NOW SERVING THE TEMPORARY FENCE INDUSTRY WITH ITS UNIQUE PATENTED **FLATLINK™** FENCE FABRIC

FEATURES

- FLATLINK™ fabric is made with 11-1/2ga pre-galvanized wire
- FLATLINK™ Fabric selvage is folded horizontally and secured with a more durable 1/2" lap-weld
- Welds are coated with a zinc-rich primer to inhibit rust

BENEFITS

- The repeat usage requirements of temporary fence distort and destroy traditional chain link which was never designed for that use. The first innovation to chain link in generations, FLATLINK™ Fabric, is use-specific to improve the quality, durability, safety, and ease of temporary fence jobs.
- Being made from GBW wire, FLATLINK™ has a smooth finish that's safer and easier to comb out than GAW
- FLATLINK™ unique selvage creates a stronger, more durable bond that is virtually snag-proof
- Rolls out like carpet, even on repeat usages
- No special tools are needed to weave FLATLINK™ rolls together. Use the same fence-pliers you've always used.
- FLATLINK™ Fabric resists distortion that turns traditional fabric into pin cushions that can injure workers and slow installation
- Easier, safer, snag free handling means quicker installs and greater productivity
- Greater durability, easier installation, and more turns on jobs means a greater return on your investment
- Large stock on hand for quick turn-around on orders

FLATLINK™ Fabric is made in the U.S.A.
